COEO[®]

Versatility.

Cooking with the Kamado QUATRO is the guarantee of having all the cooking tools combined in a single tool. It is a barbecue, an oven, a smoker or even a rotisserie in a single cooking appliance. With the different parts and accessories of the QUATRO you can cook pizzas with friends, cakes with family, and even use it as a plancha for a meal as a couple.

It's all about that flow!

Flavors.

The performance of QUATRO is based in particular on the perfect combination of its shape and the quality of its ceramic. This allows easy and quick lighting, uniform and constant cooking, preservation of food flavors, as well as low coal consumption.

Design.

The QUATRO stands out for its atypical design: the combination of the conical shape of its lid, the modern and unique finish of its ceramic, the color of the black steel as well as its compact shelves.

QUATRO

4-en-1

**SMOKER OVEN ROTISSERIE BARBECUE
& even more...**

“For a candlelit meal or a tribal feast, the QUATRO is the tool for all your desires!”

Upper vent

Serves as a regulator (thermostat) and allows you to control the air flow. Complementary with lower draft ventilation. Thanks to this element, it is easy to manage the rise in temperature as well as its maintenance during cooking.

Multi-position cast iron ventilation made up of 3 distinct parts for precise temperature adjustment. Can be opened completely for a rapid rise in temperature. Partial opening with radial smoke outlet.

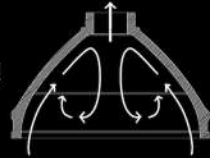

Lid in ceramics

Lid designed to evenly redistribute heat and moisture from food. The performance of QUATRO is based in particular on the perfect combination of Shape & Material: the conical shape and quality of the ceramic allow easy and rapid lighting, uniform and constant cooking, preservation of food flavors, as well as low energy consumption. coal.

Split & Mix

Allows you to cook a variety of foods simultaneously, at different temperatures by varying the heights and cooking methods. 1 single accessory for Separating & Mixing direct and indirect cooking!

It's all about that Flow !

Firebox

Made up of a single ceramic element with a unique alloy ensuring high resistance.

Body of the QUATRO

Dense and thick ceramic (35mm). Allows optimal heat preservation inside the QUATRO for several hours. Ceramic composed of an alloy including cordierite and sillicate (mullite) providing resistance to thermal and physical shock. This ceramic is the most innovative on the market. Ceramic : Life-long guarantee

Lower vent

Allows a large supply of oxygen to light the fire and manage the cooking temperature in the QUATRO. Also makes cleaning up ashes easier.

Half moon grill cast iron - Ref HMQL2

Cover - Ref HPQUATROL

Deflector - Ref DQL

Pizza stone - Ref PSQL

Extension - Ref EXTGQL

ACCESSORIES QUATRO M

INCLUDED "STANDARD" :

Grille fonte circulaire - Ref CIM

OPTIONS :

Split & Mix - Ref SMQM

High Stand - Ref HSQM

French startup with an international touch!

For us, what is exciting isn't breaking the rules, it's creating new ones!

In 2024, we are celebrating our 4th anniversary and receiving the prestigious 2 “German Design Award 2024” and “If Design Award” design prizes.

We launched COEO in March 2020 during the first lockdown to create products that share our passion for outdoor cooking.

COEO means “to gather together” in Latin and it has a lot of meanings for us. We created COEO by combining our skills: Engineering and Gastronomy. Our mission is to manufacture products that allow everyone to express their own version of conviviality: users from all continents, countries, backgrounds and cultures are represented... We are committed to promoting all versions of cuisine outside. We like to vary the materials, the design, the ideas... and put them at the service of different kitchen styles and architectural styles.
